

NEW ADVANCEMENT IN BOVINE REPRODUCTION

VetMotl™, Inc.

MULTI (850µL, 3ML) SPERM SEPARATION DEVICES

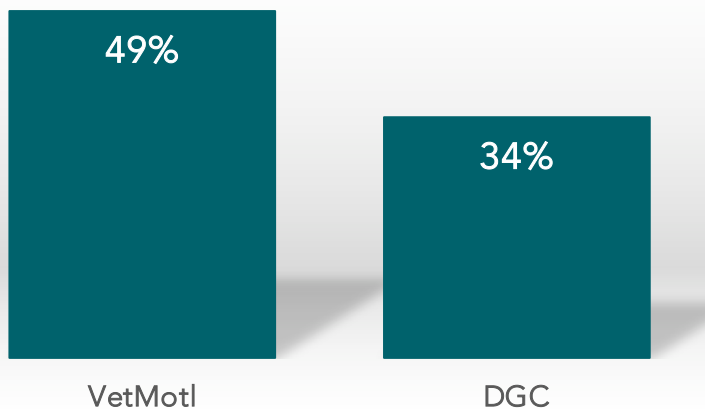

VetMotl Sperm Separation Devices, first-of-their-kind lab tools for use in veterinary assisted reproductive technology procedures.

Our devices have been commercialized for use in human fertility clinics as ZyMōt® Sperm Separation devices since 2015.

VMB0850 (850µl) and VMB03000 (3ml)

44% Increase
blastocyst rate

VetMotl prepared spermatozoa induced a significantly higher blastocyst rate at day 7 compared to DGC¹.

- ✓ Optimized for use in bovine IVF
- ✓ Conventional or sexed semen
- ✓ No special media needed
- ✓ Replaces traditional methods including swim up, wash, and density gradient centrifugation (DGC)
- ✓ Ready to use & easy to adopt
